VERIFAI

Modern AI Product Verification — Complete UI/UX Prototype

Updated visual direction • 2026-style interface • Consumer + Admin + Company + Inspector

This visual board is now part of the prototype file and defines the modern visual direction for the implementation.

01 — Modern Design Direction

The prototype moves away from basic cards/wireframes toward a premium, product-led interface: dark cinematic surfaces, electric blue/cyan accents, glass-like panels, large visual hierarchy, compact data cards, clear status states, and role-specific dashboards.

Area	Modern UI direction
Consumer	Mobile-first, camera-first scanning, large result states, evidence cards, bottom navigation.
AI Processing	Animated progress, percentage/progress ring, individual AI pipeline steps.
Verification	Large verified/suspicious/not-verified states with product image and evidence summary.
Admin	Professional SaaS dashboard, KPI cards, charts, review queues and data tables.
Company/Importer	Product management, code generation, batch management, verification status and reports.
Inspector/Authority	Case review, reported products, evidence comparison and resolution workflow.
Responsive	Phone → tablet → desktop with the same design system and responsive components.

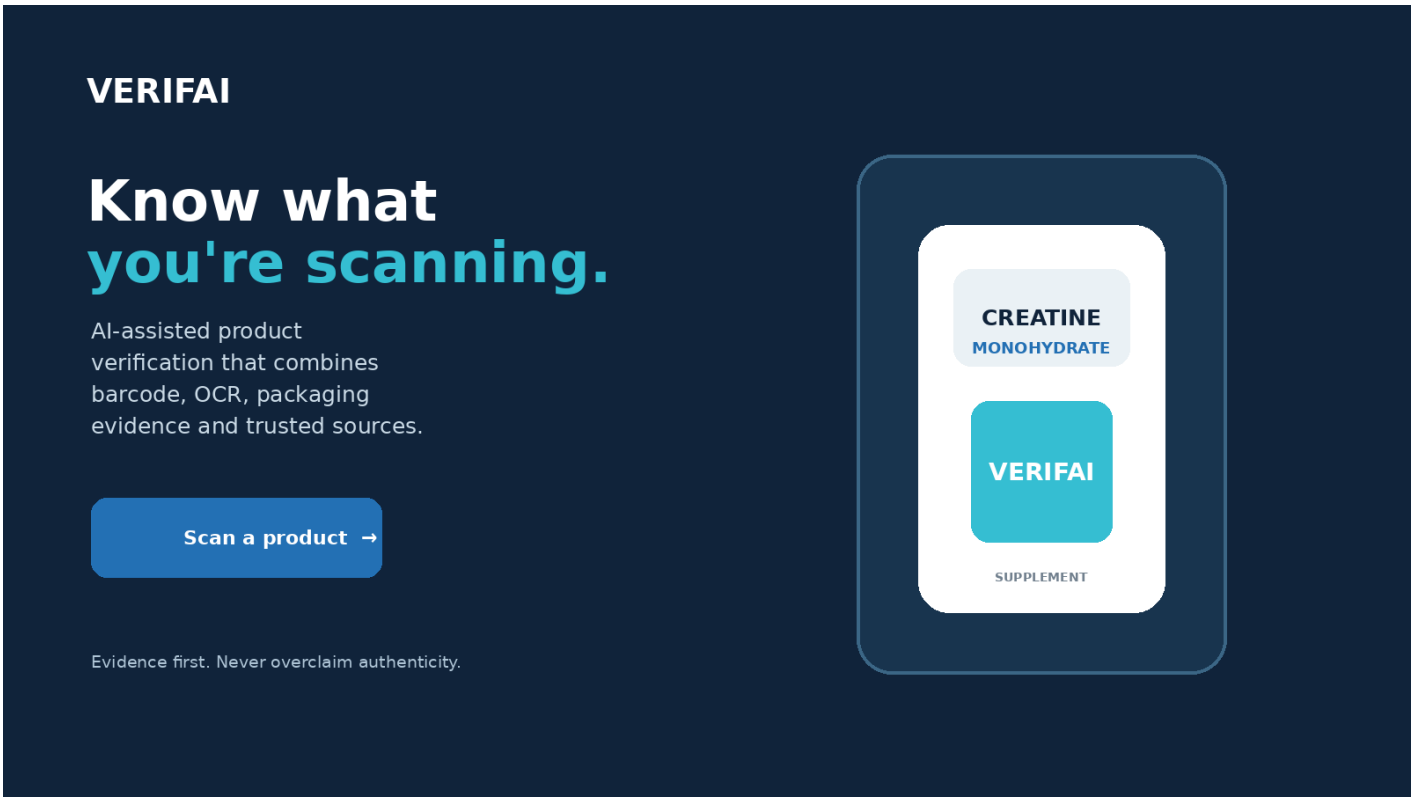

02 — Role-Based Product Experience

Role	Login → Main experience → End state
Consumer	Login/Sign up → Home → Scan → AI analysis → Result → Evidence → History/Report
Admin	Admin login → System dashboard → Companies → Sources → Reports → Case review → Settings
Company / Importer	Company login → My products → Add product → Batch/codes → Verification statistics → Reports
Inspector / Authority	Authority login → Reported products → Inspection requests → Evidence review → Resolve case

03 — Complete Start-to-End Screen Map

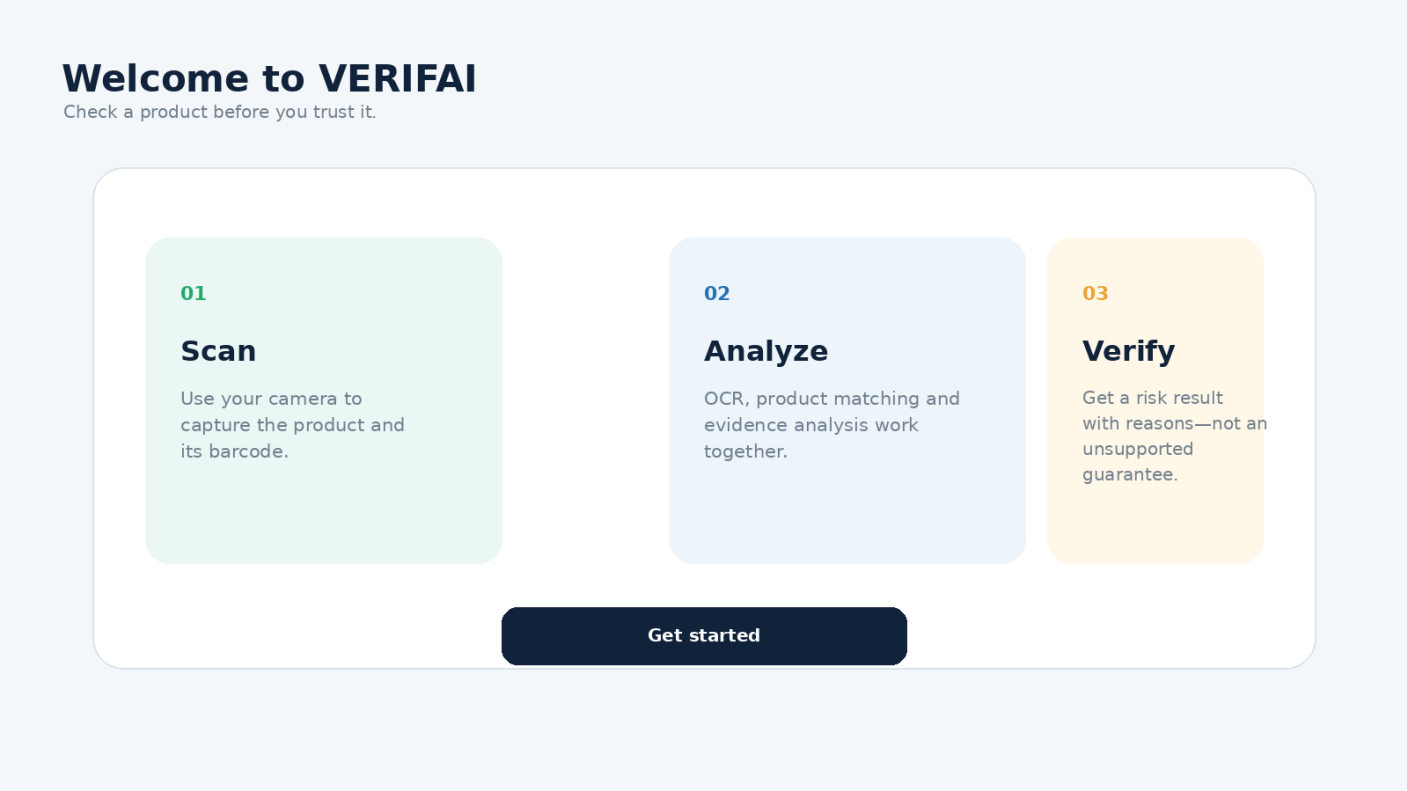

Splash → Onboarding → Login/Sign Up → Home → Scan Product → AI Processing → Verified/Suspicious/Not Verified → Product Details → AI Evidence & Analysis → Scan History → Report Product → Profile & Settings → AI Explanation.

01 — Landing / Splash

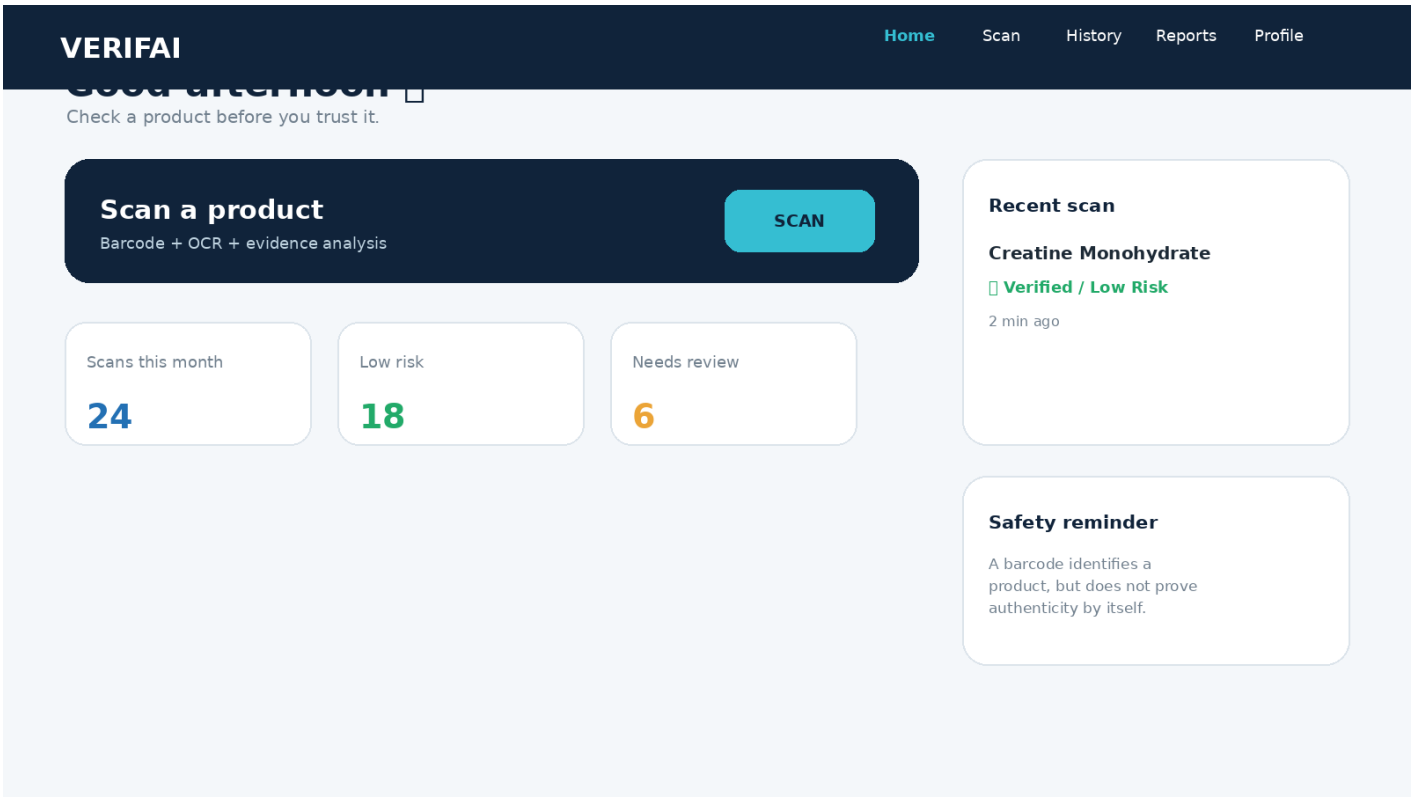

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

02 — Onboarding

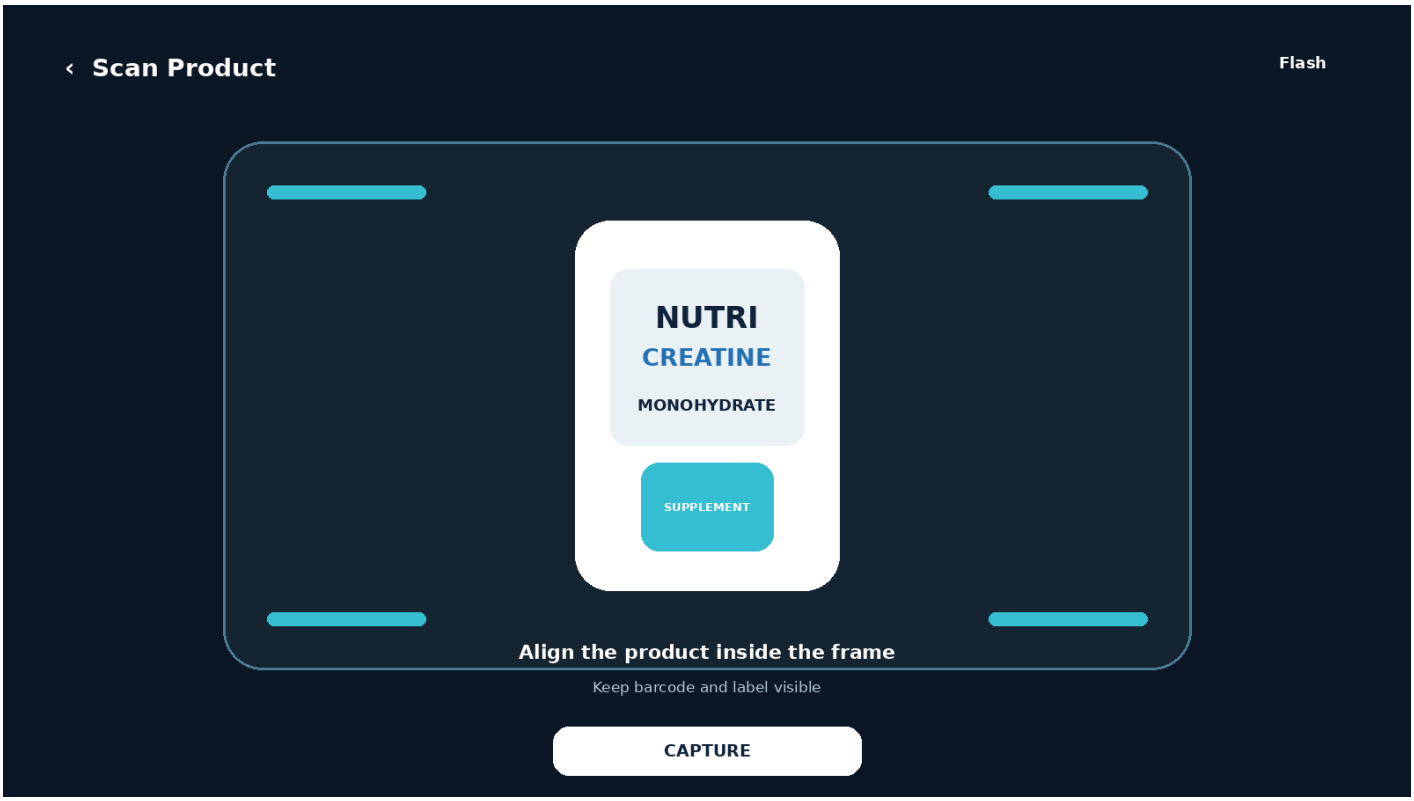

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

03 — Home Dashboard

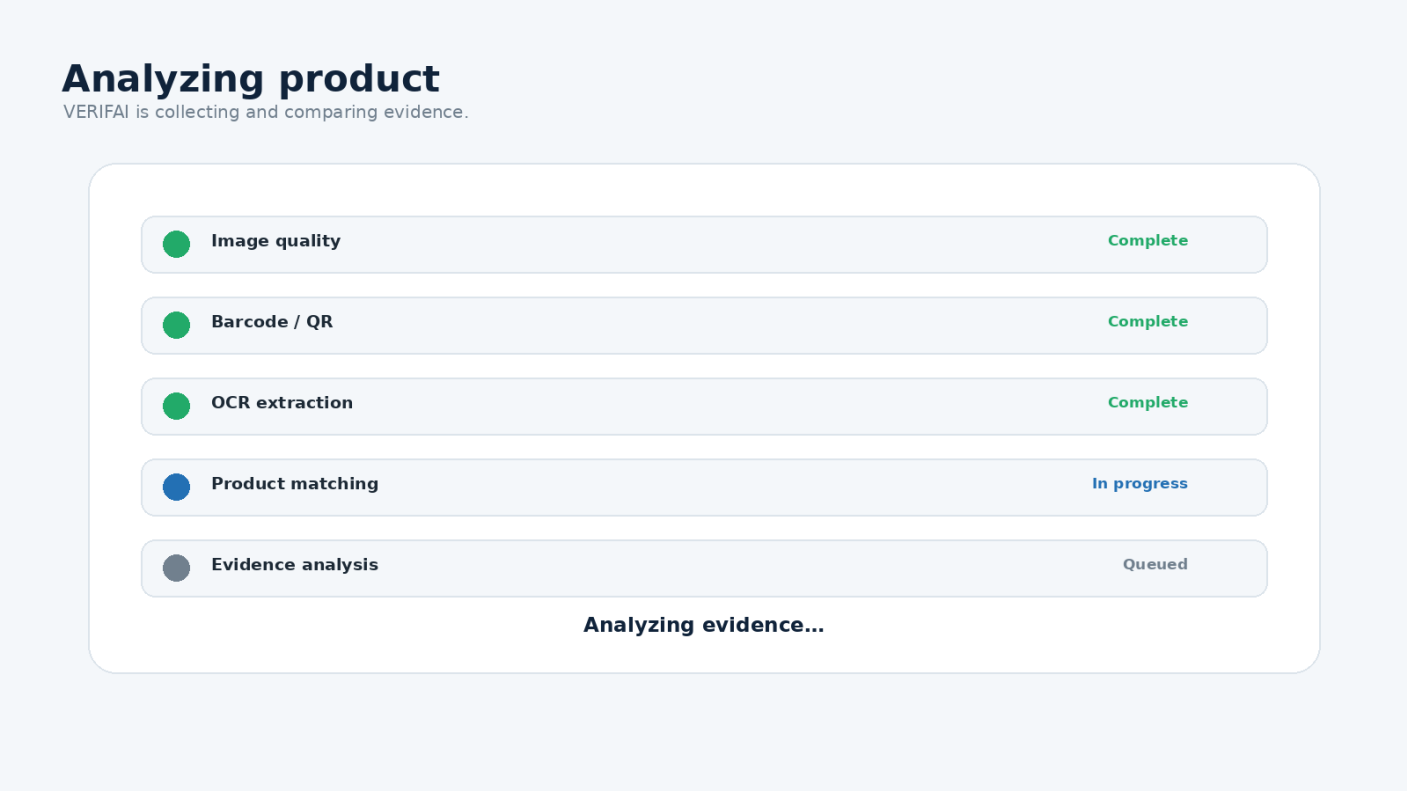

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

04 — Camera Scanner

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

05 — AI Processing

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

06 — Extracted Product Data

Extracted product data

Review what the AI actually found.

Detected product

Brand

NUTRIFORGE

Product

Creatine Monohydrate

Barcode

OCR fields

Batch / Lot

CF-24091

Expiry

2028-04

Manufacturer

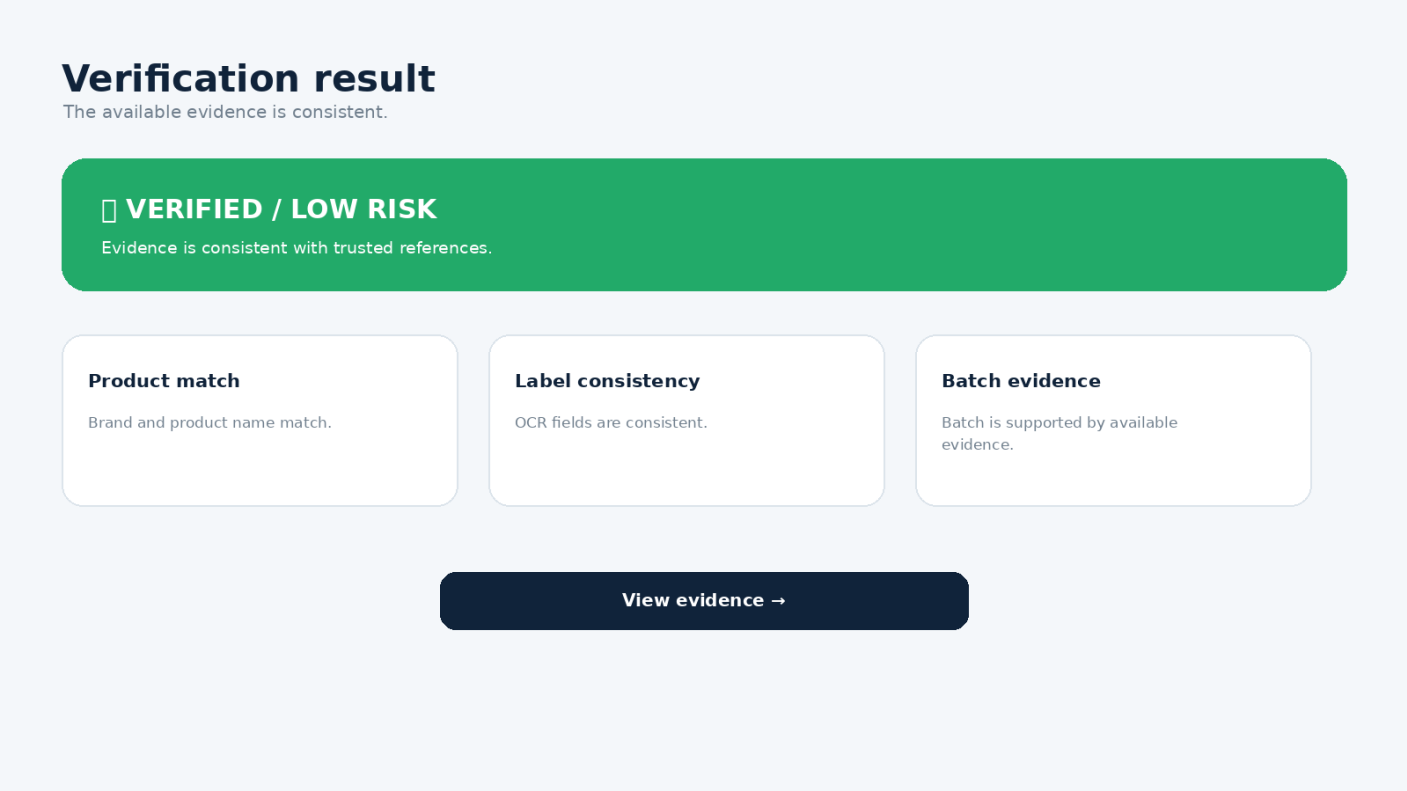

Nutriforge Labs

OCR confidence

96%

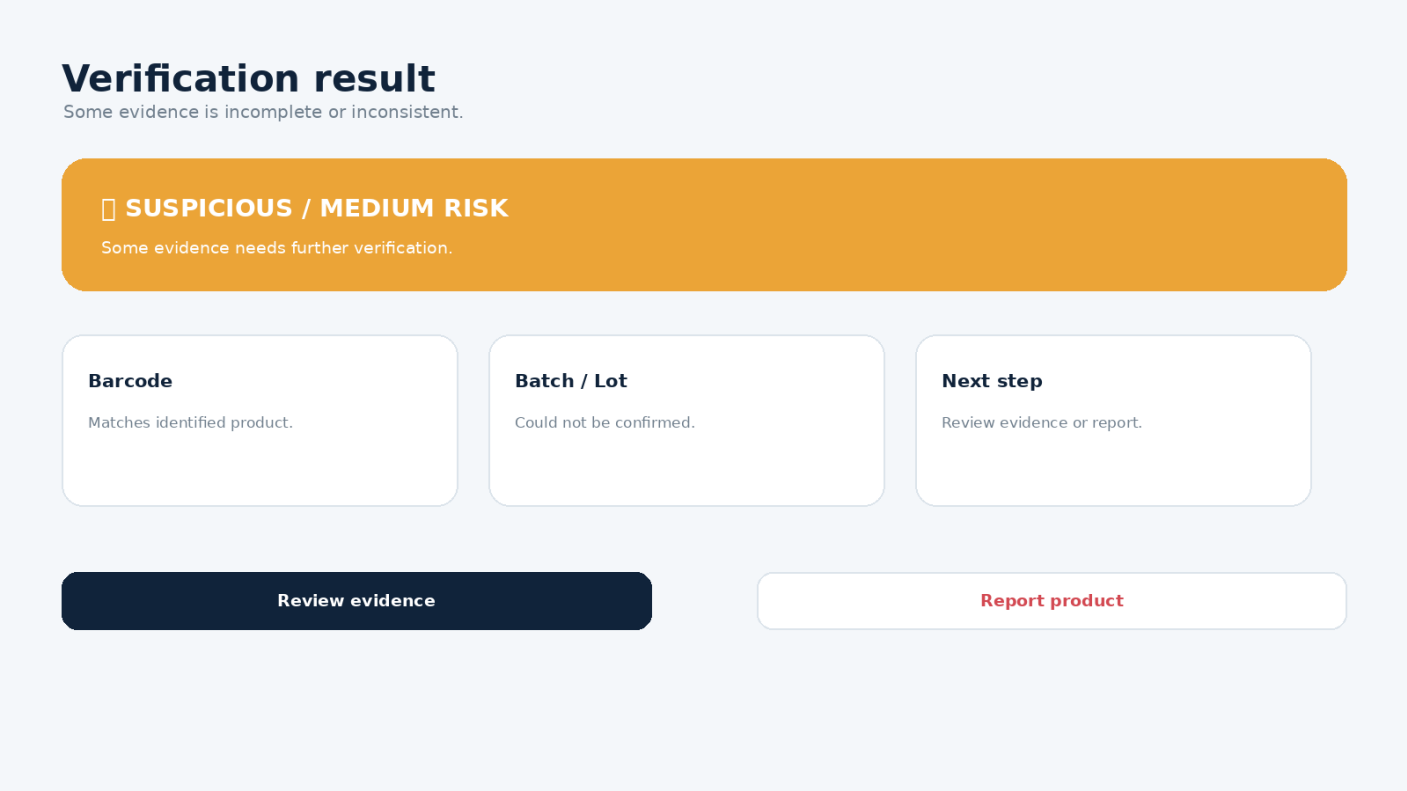

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

07 — Verified / Low Risk

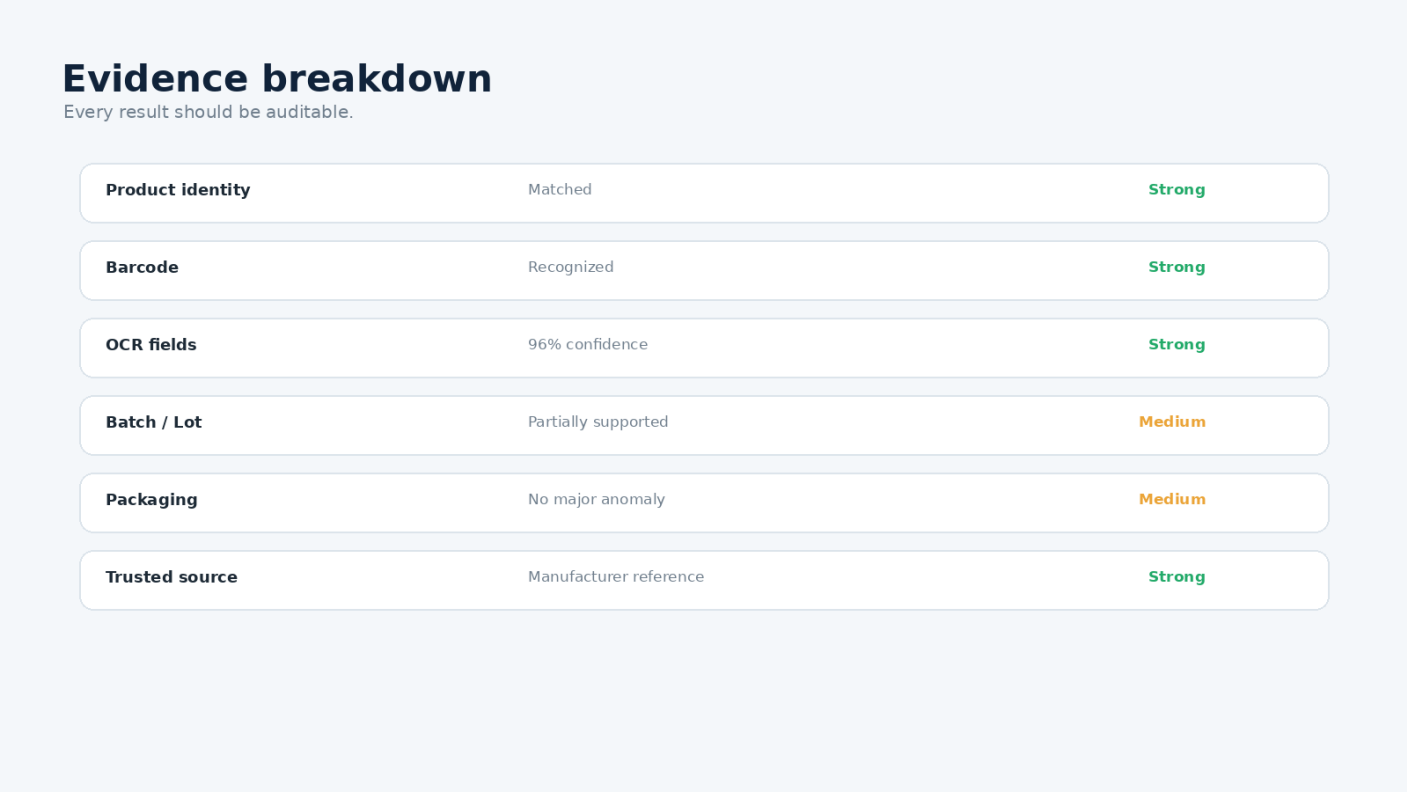

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

08 — Suspicious / Medium Risk

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

09 — Evidence Breakdown

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

10 — Product Details

Product details

Identity, extracted data and reference source.

Reference evidence

Source: Authorized manufacturer reference Last checked: Today
Fields matched: 8 / 9
Unresolved: 1 field Source trust: HIGH

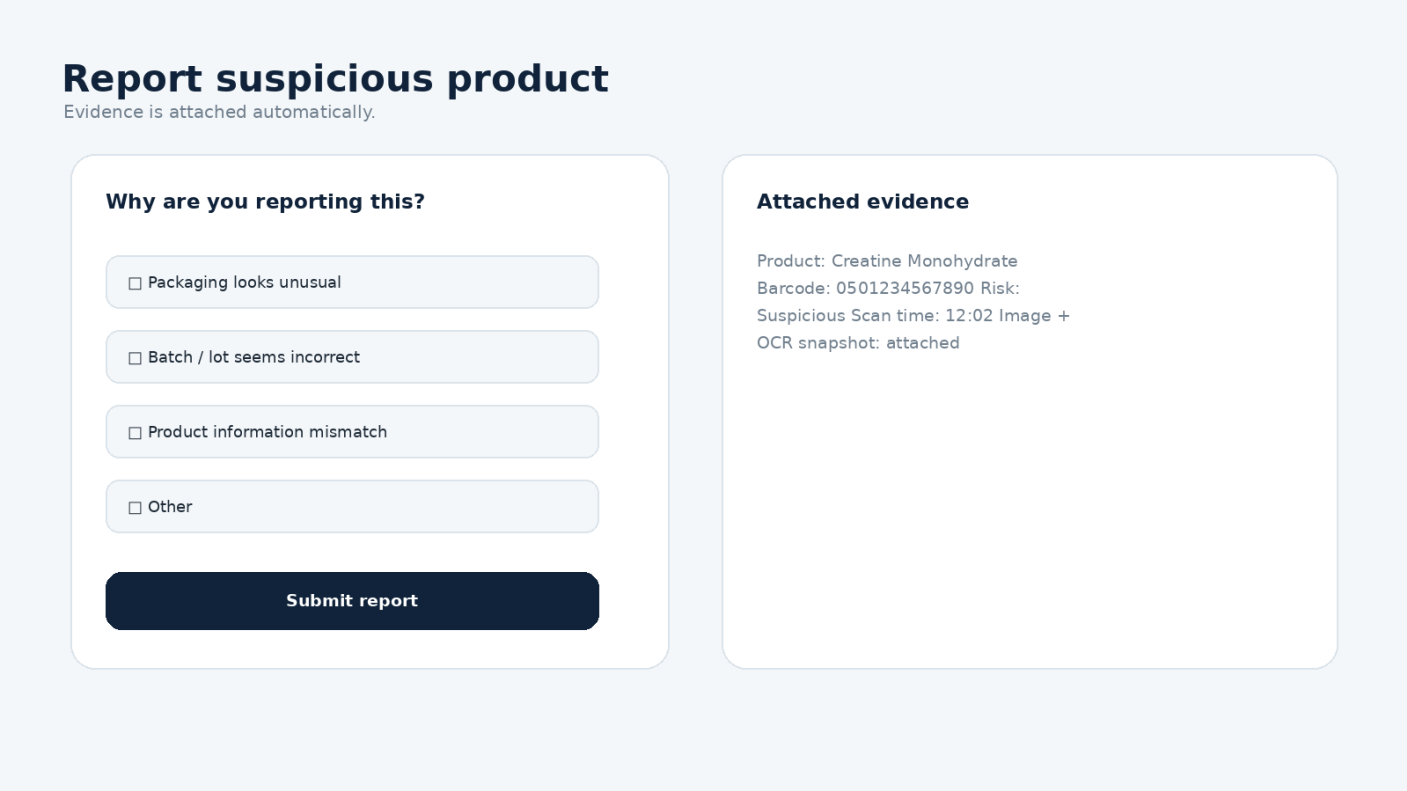

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

11 — Scan History

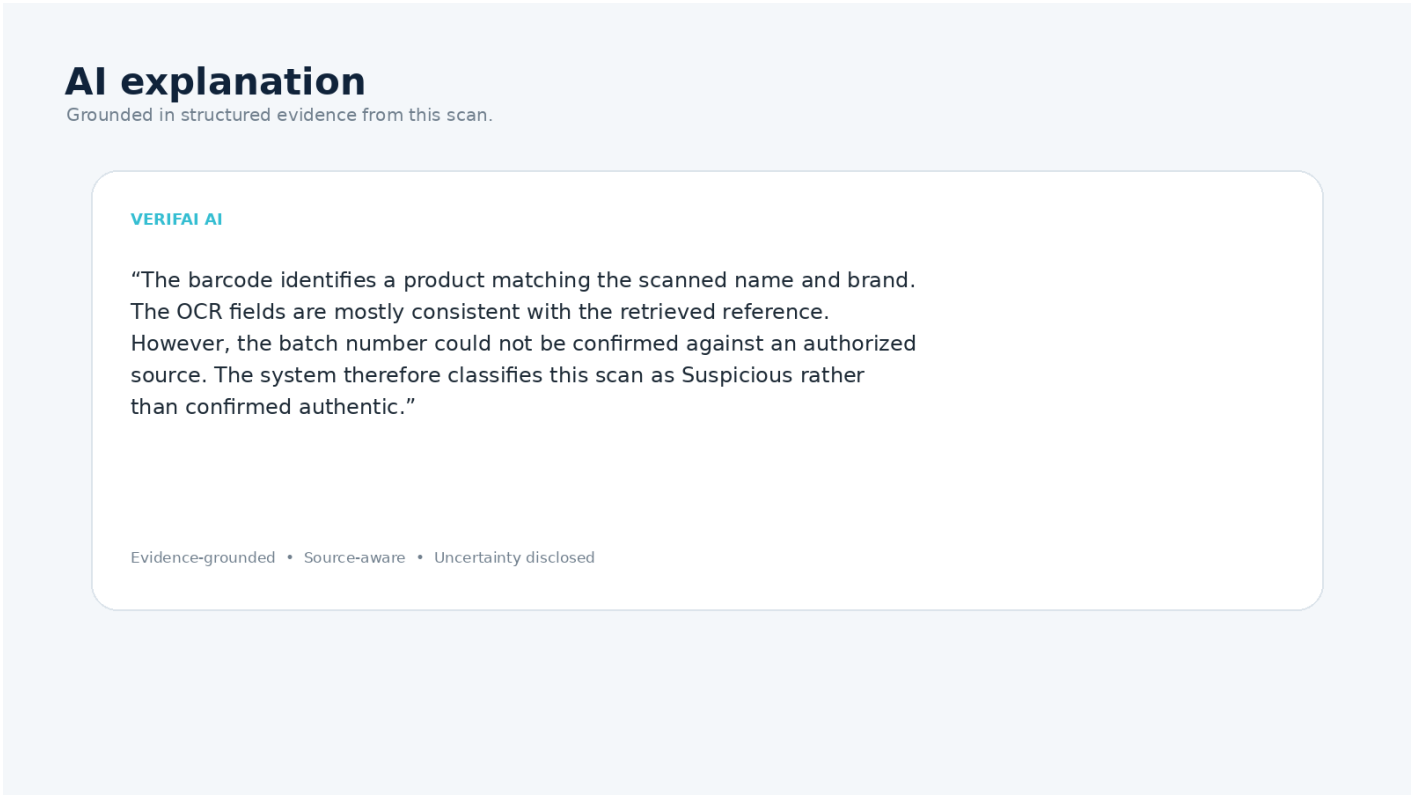

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

12 — Report Suspicious Product

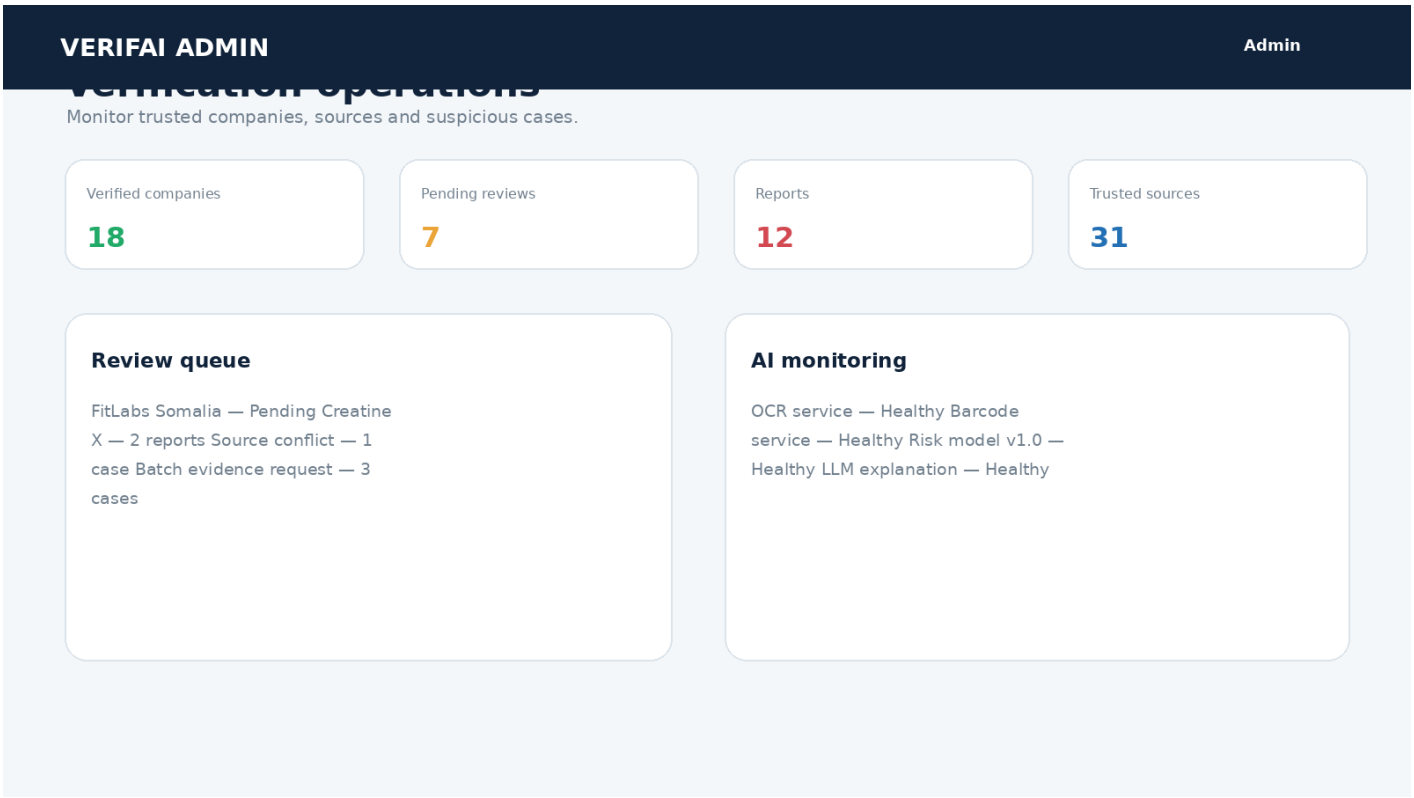

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

13 — AI Explanation

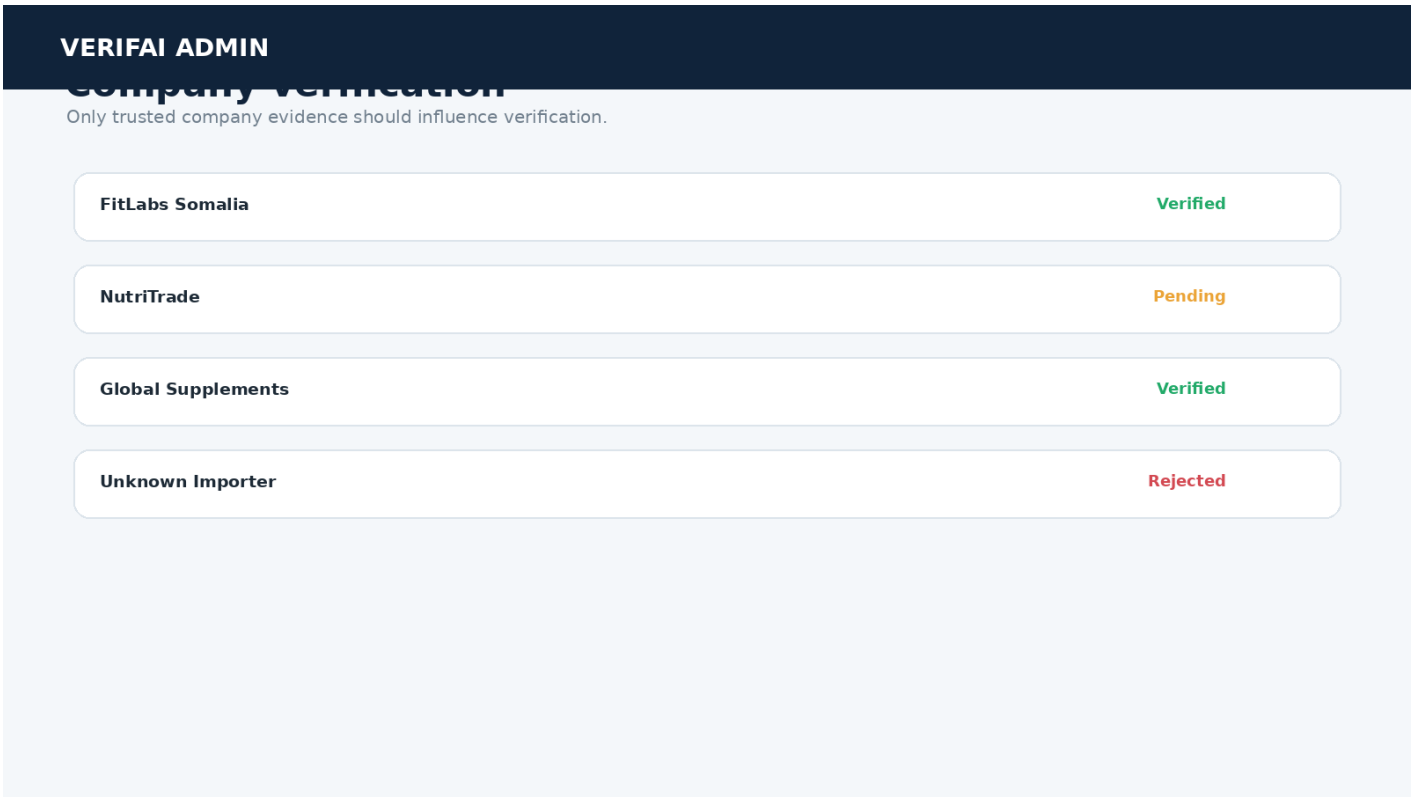

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

14 — Admin Dashboard

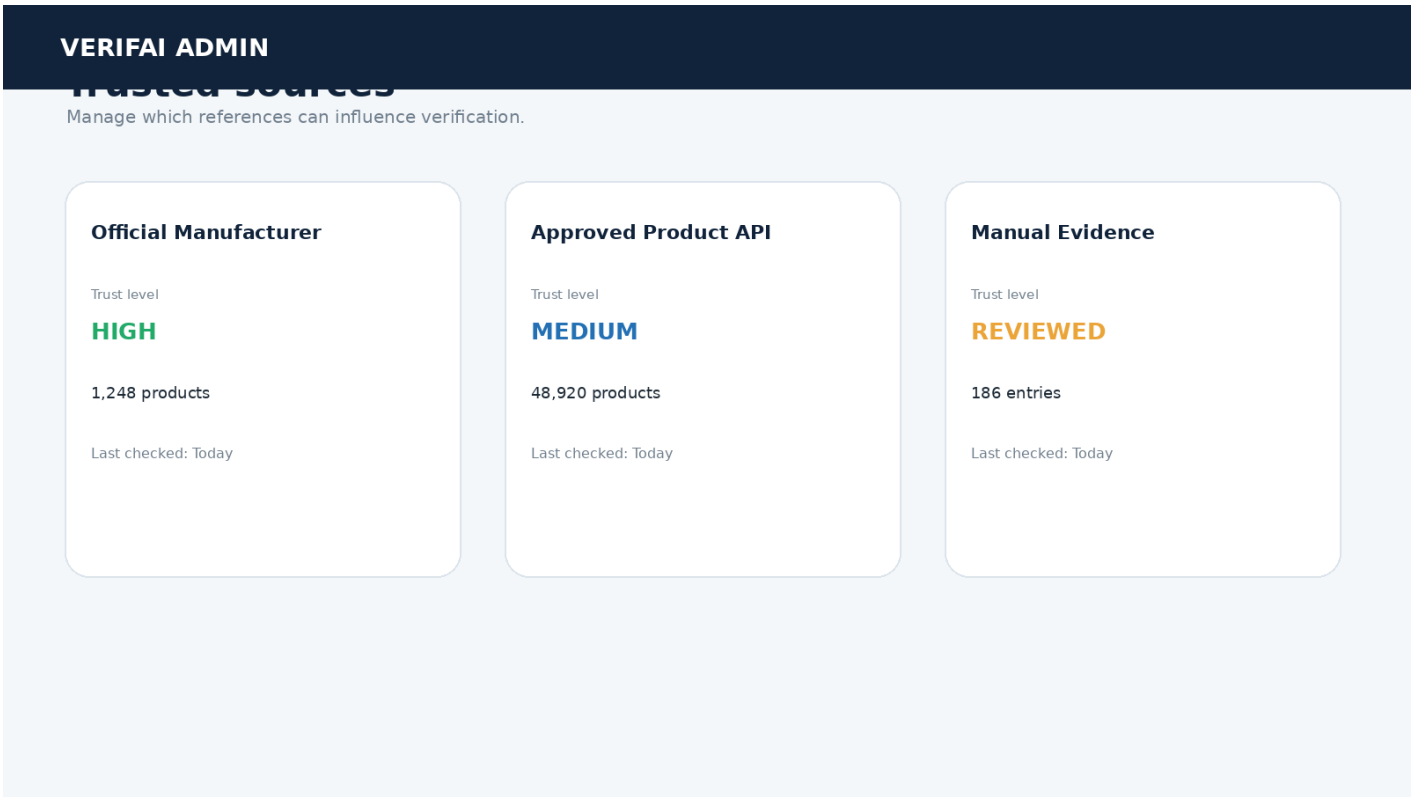

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

15 — Company Verification

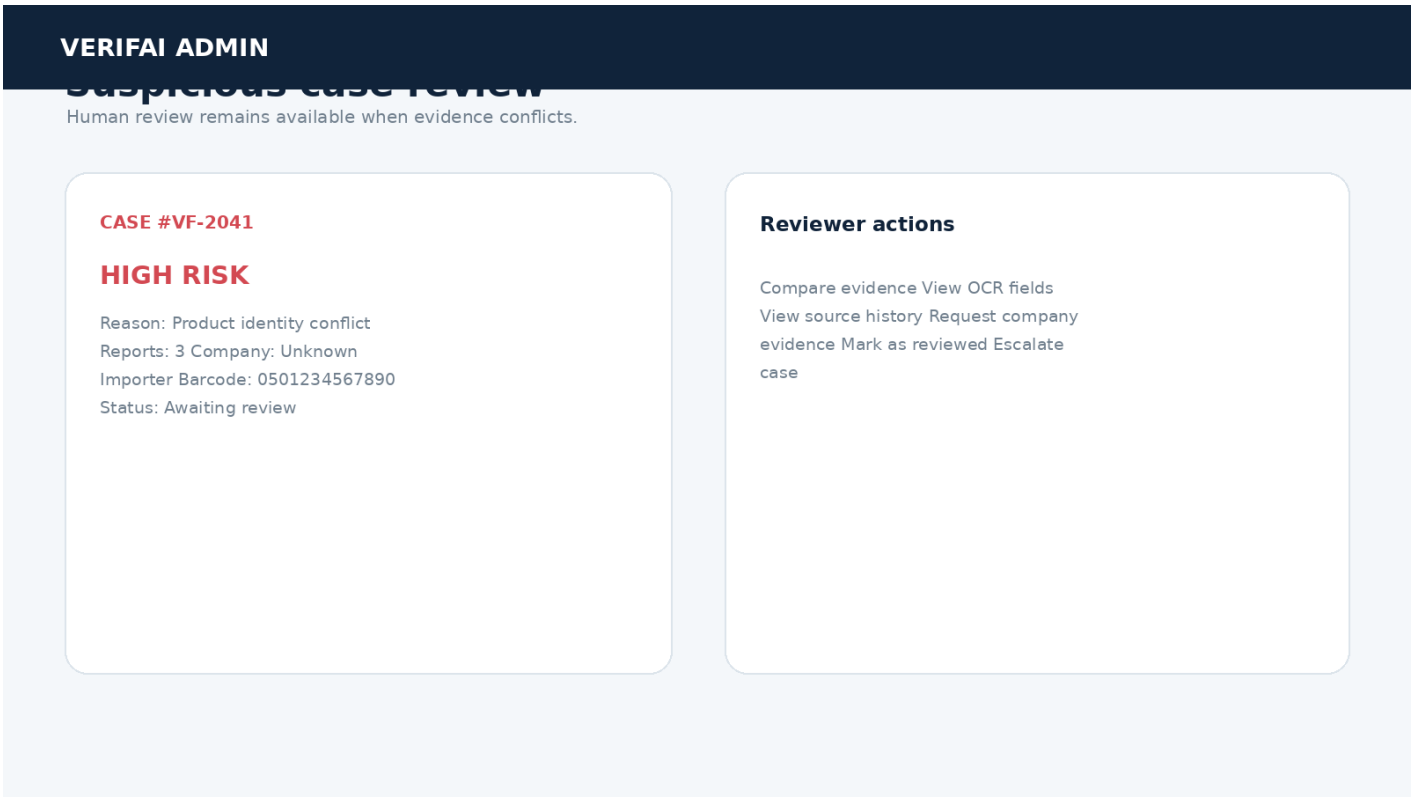

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

16 — Trusted Sources

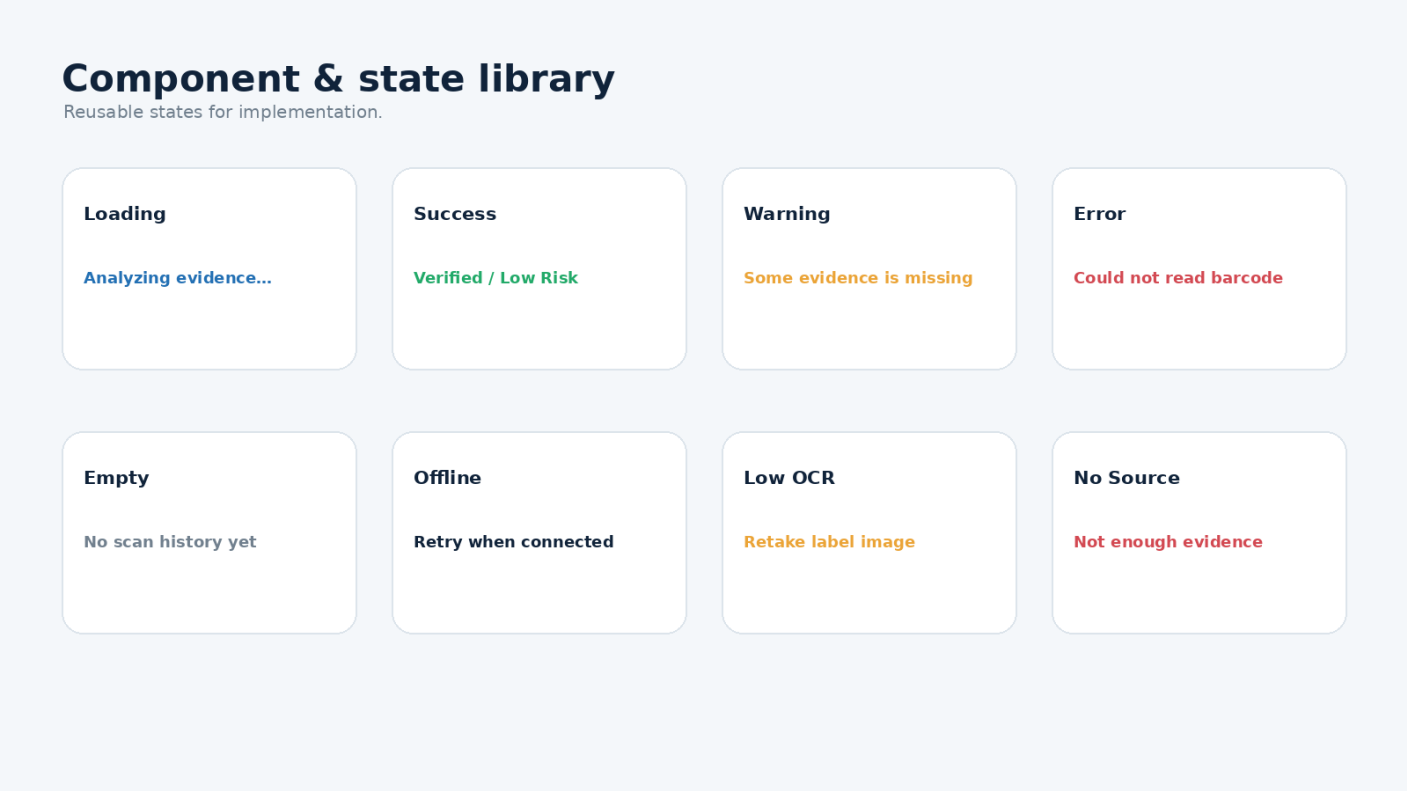

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

17 — Suspicious Case Review

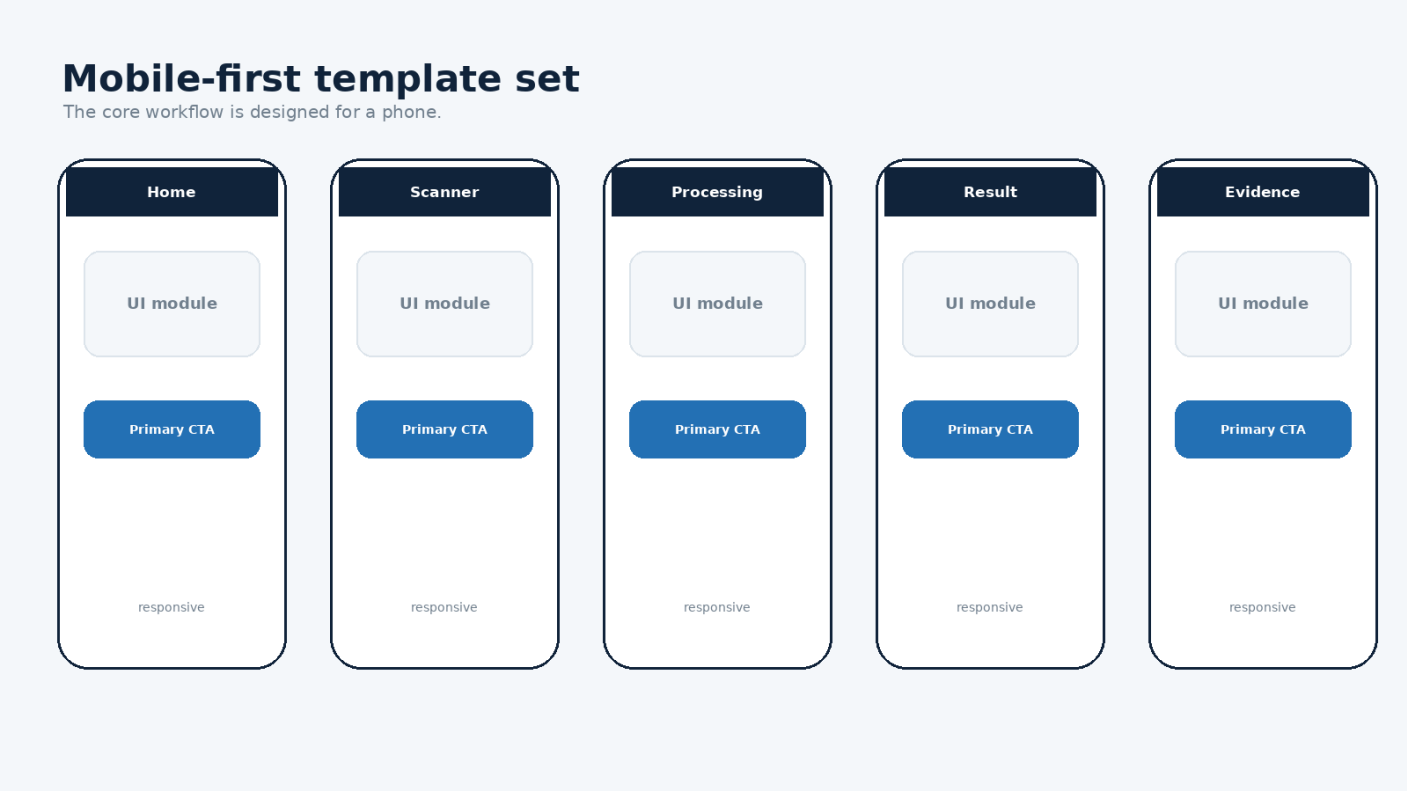

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

18 — Component & State Library

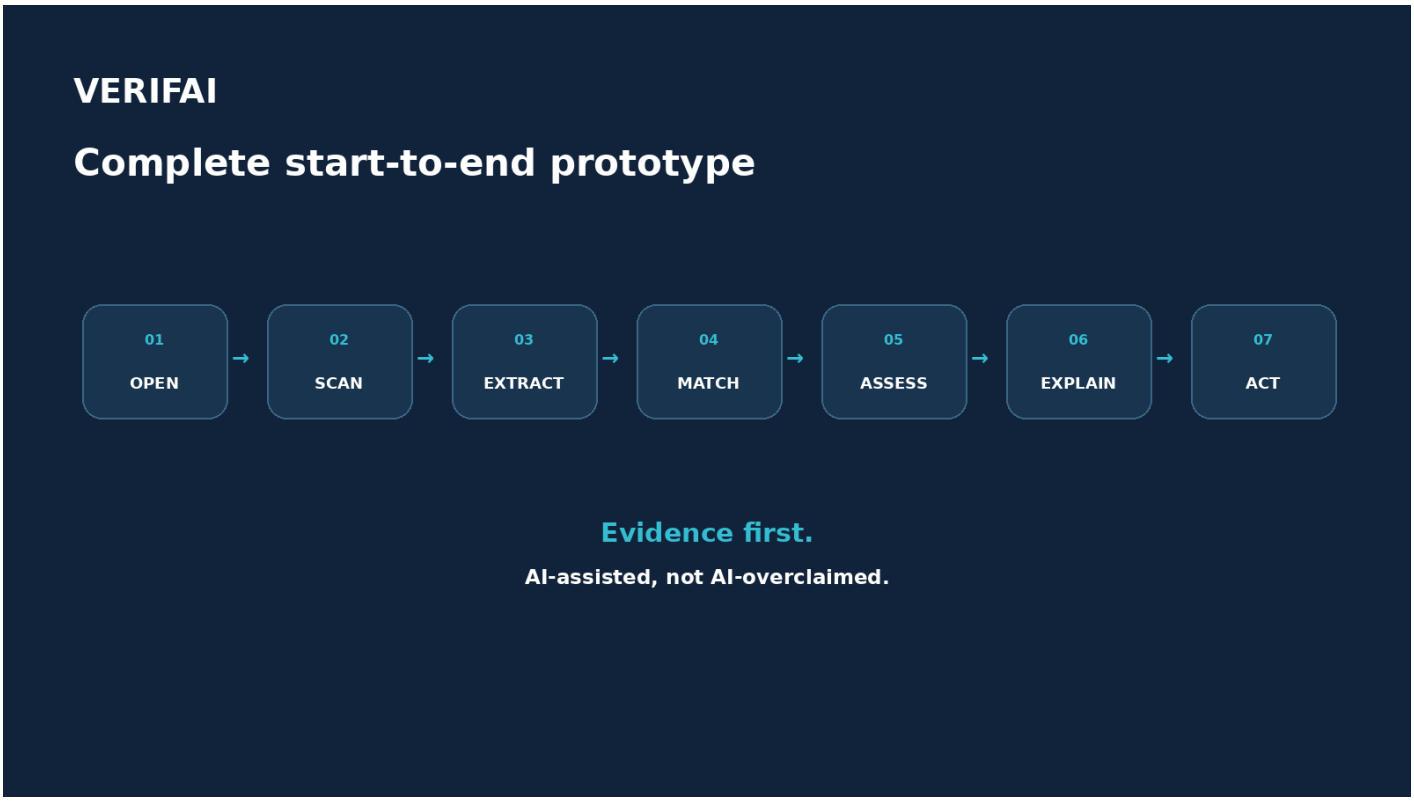

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

19 — Mobile Responsive Templates

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

20 — Complete Start-to-End Flow

High-fidelity visual reference for implementation. Preserve hierarchy, status language, spacing and responsive behavior.

04 — Final Implementation Rule

The modern collage is the visual north star. The individual screens in this file are implementation references. The final application should use the same premium visual language across every role rather than mixing unrelated dashboard styles.

SCAN • ANALYZE • VERIFY

Evidence first. AI-assisted. Source-aware. Modern by design.
